WHAT TO EXPECT?

Looking for examples of the exciting things you'll be doing at the conference? Take a look at an overview of last year's conference below.

DAY ONE

Everyone checks in to the residence where we'll be staying, and immediately participants will be engaged in a short engineering design challenge, THE EGG-DROP CONTEST! After dinner, a one-hour presentation from our guest speaker is followed by icebreaker activities and sports tournaments.

DAY TWO

***Rise and shine!** A long and eventful day awaits. The morning consists of a tour of the different laboratories at the University of Toronto Institute of Aerospace Studies(UTIAS), including flight simulators, satellite design facilities, engine labs, and much more. After lunch, the trip resumes at the Canadian Air & Space Museum.*

Sounds like a full day's worth of activity? Well, after the tours, we return to campus to have dinner, more guest speaker presentations, and finally some . At night, everyone gets some free time for some final preparation and, more importantly, lots of rest for the big day!

DAY THREE

The big day is finally here! Everyone is assembled to present their solutions at the design fair. Judges from different corporations and universities will be here to critique your design. Including set-up, presentations, and plenary sessions, the design fair will run all the way into the late afternoon.

With the design fair concluded, there's actually still a lot more things to be done! A capture-the-flag event will be held on the UofT campus right after dinner, which went on into the night. The night concluded while everyone simply relax and bask in the satisfaction of a long day's work and fun.

DAY FOUR

Awards, awards, awards! When breakfast is finished, we will be handing out the awards to the groups with the best and most innovative designs. The 4-day conference reaches its conclusion, but not before everyone's experience a wonderful time full of excitement and learning.
